

PWS SERIES

Stainless steel pressure washer couplings

INTRODUCTION

Holmbury's PWS Series stainless steel, pressure washer couplings are able to accommodate high flow rates and minimal pressure drops. The couplings are valveless, hence when disconnected any fluid in the system can escape. This makes these couplings suitable for the transmission of non-hazardous fluids only.

CONSTRUCTION

- AISI 316 stainless steel
- Fitted with Viton seals
- Also available in carbon steel (See PWC Series)

FEATURES

- Valveless design allows for high flow rates and minimal pressure drop characteristics
- Female half has double 'O' ring sealing arrangement
- Bidirectional flow

ACCESSORIES

- Seal Kits are available for the PWS Series

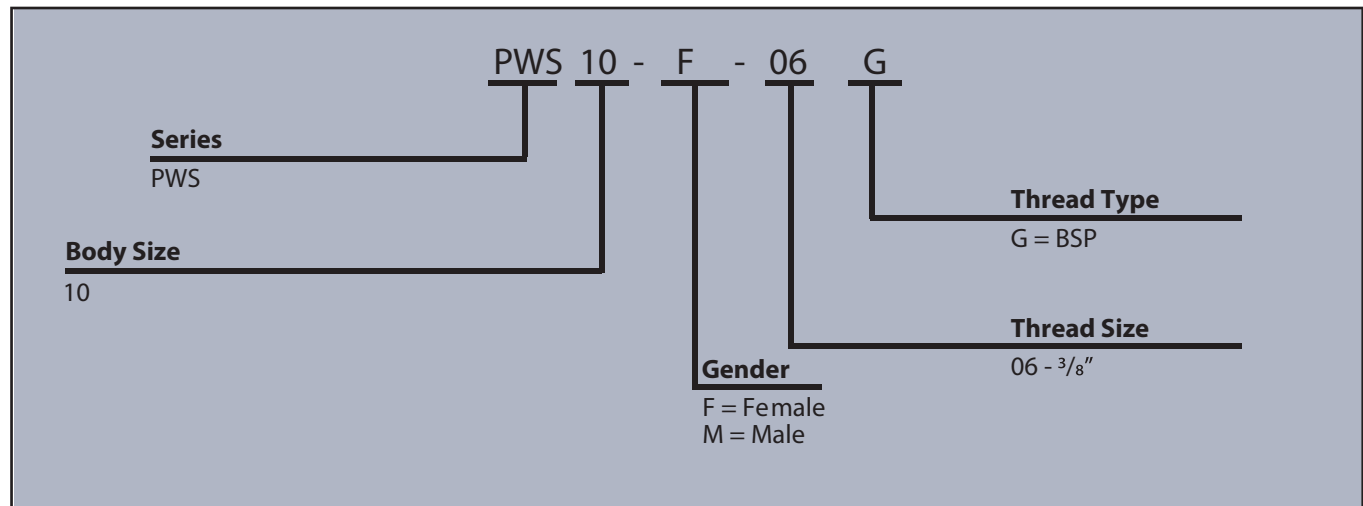

SPECIFICATIONS

- Operating temperatures (With Viton seals): -20°C (-4°F) to 200°C (392°F)

APPLICATIONS

- Designed for use in pressure washer systems and systems containing non-hazardous fluids
